

# Kartik Sahu

+91 9082523225 | kartik.sahu3311@gmail.com | [LinkedIn](#) | GitHub: [@Kartiksahu03](#) | [Portfolio](#)

---

## TECHNICAL SKILLS

**Languages:** JavaScript, Python, SQL

**Frameworks/Libraries:** React.js, Redux, Express.js, Node.js

**Databases:** MongoDB

**Tools:** Git, GitHub, Postman, VS Code

**Core Concepts:** Data Structures & Algorithms, REST APIs, OOP, DBMS, Operating Systems

**AI-Assisted Development:** Proficient in leveraging tools like GitHub Copilot and ChatGPT for prototyping, debugging, AI integration and code optimization

---

## PROFESSIONAL EXPERIENCE

**CodeVista Innovations (Remote)**

**Full Stack Frontend Intern**

**Mar 2024 - May 2024**

- Developed a React-based analytics dashboard visualizing user engagement data, reducing bounce rate by 25% within 2 weeks.
  - Integrated REST APIs across 3 microservices, improving data synchronization and reducing load time by 30%.
  - Collaborated in a team of 5 to build a student progress tracker used by 100+ students.
- 

## PROJECTS

**AI-Powered E-Learning Platform (MERN + Payments + AI)**

[Project link](#)

- Built a production-grade full-stack platform with JWT authentication and role-based access across 15+ protected routes.
- Designed a scalable system supporting 100+ courses with enrollment dashboards and real-time progress tracking.
- Integrated Razorpay for secure payments and automated course enrollment workflows.
- Developed a contextual AI assistant handling 10+ user intents (course queries, FAQs, navigation) using Groq API.
- Engineered real-time cart and state management using Redux Toolkit, reducing UI re-render latency by ~30%.
- Built analytics dashboard tracking revenue, engagement, and course performance metrics.
- Optimized backend APIs handling 500+ test requests with improved reliability; deployed on Vercel + Render.
- Tech:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Redux Toolkit, Razorpay API, JWT, Groq AI

**Shopping Cart SDK (Reusable MERN Module)**

[Project link](#)

- Developed a reusable SDK enabling plug-and-play cart and checkout integration across applications.
- Designed modular APIs for cart operations and pricing, improving integration efficiency by ~40%.
- Implemented persistent state management for seamless cart recovery across sessions.
- Built scalable backend services to handle concurrent cart operations with data consistency.
- Structured SDK with extensible architecture for coupons, taxes, and payment integrations.

**Tech:** React.js, Node.js, Express.js, MongoDB, Redux

**Random GIF Finder**

[Project link](#)

- Built a React application integrating the Giphy API for random GIF generation and tag-based search.
- Implemented custom React hooks for async API calls, managing loading and error states without Redux

**Tech:** React.js, React Router, JWT, JavaScript

---

## EDUCATION

**University of Mumbai**

BTech in Electronics Engineering

**2022 - 2026**

- Secured 2nd rank among 60+ students in departmental coding challenge, demonstrating analytical and problem-solving ability.
- Applied DBMS, Architecture, and Java DSA concepts in team projects and hackathons, strengthening practical development skills
